

## Psychiatrist (MD, DO) Opening

### **Part-Time/Full-Time**

**Job Title:** Psychiatrist (MD, DO)

**Reports to:** Medical Director/CEO

### **Job Summary:**

As a psychiatrist, you will be responsible for diagnosing, treating, and providing ongoing care for patients with mental health disorders. Your expertise will contribute to improving the well-being and quality of life of individuals struggling with various psychiatric conditions. The ideal candidate will possess exceptional clinical skills, excellent communication abilities, and a deep commitment to patient care.

### **Responsibilities:**

- Conduct comprehensive psychiatric evaluations to assess patients' mental health status, including the collection of medical history, symptoms, and relevant psychosocial information.
- Accurately diagnose psychiatric disorders based on the evaluation of patients' symptoms, medical records, and diagnostic tests.
- Develop personalized treatment plans in collaboration with patients, incorporating psychotherapy, medication management, and other therapeutic interventions as appropriate.
- Prescribe and monitor the effectiveness of psychotropic medications, adjusting dosage or medications as needed to optimize patient outcomes.
- Offer crisis intervention services for patients experiencing acute distress, exhibiting suicidal ideation or medical emergency, ensuring their safety and arranging appropriate follow-up care.
- Collaborate with multidisciplinary teams, including psychologists, social workers, nurses, and other healthcare professionals, to coordinate comprehensive care plans and ensure continuity of treatment.
- Maintain accurate and up-to-date medical records, documenting patient evaluations, treatment plans, progress notes, and medication prescriptions in compliance with legal, ethical standards, and practice policies.
- Stay abreast of advancements in the field of psychiatry, attending conferences, workshops, and engaging in continuous professional development activities.
- Educate patients, their families, and the community about mental health conditions, treatment options, and strategies for prevention.
- Adhere to all relevant medical laws, regulations, practice policies, and ethical standards, demonstrating integrity, and professionalism in all interactions.

---

### **Qualifications:**

- Medical degree (MD or DO) from an accredited medical school.
- Successful completion of a residency program in psychiatry and board certification in psychiatry.
- Valid and unrestricted license to practice medicine as a psychiatrist.
- Proven experience diagnosing and treating a wide range of psychiatric disorders across different age groups.
- Knowledge of and proficiency in evidence-based psychiatric treatment modalities, including psychopharmacology and psychotherapy.
- Strong interpersonal skills with the ability to build rapport and establish therapeutic relationships with patients.
- Excellent communication skills, both verbal and written, enabling effective collaboration with patients, families, and the healthcare team.
- Ability to work independently as well as in a team-oriented environment, promoting a patient-centered approach to care.
- Attention to detail, organizational skills, and the ability to manage time effectively to ensure timely and accurate completion of tasks.
- Compassion, empathy, and a genuine desire to improve the lives of individuals suffering from mental health conditions.
